Top Skills

Cornerstone
ASP.NET
Microsoft Power BI

Languages

Arabic (Native or Bilingual)
English (Professional Working)

Certifications

Learning Node.js
Become a Node.js Developer
Node.js Essential Training
GraphQL Essential Training
Practical Java concurrency with the Akka Actor Model

Amr GabAllah

Senior Software Engineer @ Rology | Java, Javascript, Node.js
Alexandria, Egypt

Summary

As a Senior Software Engineer, I leverage over seven years of expertise in software engineering to design, develop, and maintain cutting-edge solutions that drive efficiency and innovation. My technical proficiency spans Java, Node.js, Vue, and other modern web technologies.

Previously at Rology, I played a pivotal role in advancing healthcare technology. I led the development of a specialized reporting tool that streamlined workflow for medical professionals and contributed to an advanced Medical Viewer for medical image visualization. My collaboration with cross-functional teams ensured FDA clearance for platform components, upholding compliance and safety standards.

Experience

BEYONITY
Software Developer
November 2024 - Present (1 year 1 month)
Berlin, Germany

Rology
Senior Software Engineer
October 2021 - November 2024 (3 years 2 months)
Cairo, Egypt

- Led the development of the leading medical image viewer in Egypt and the MENA region, revolutionizing medical imaging workflows for healthcare professionals.

- Contributed to the open-source community, with significant contributions to the Cornerstone 3D library, advancing imaging capabilities for developers worldwide.

- Led the development of a powerful reporting tool, enabling radiologists and healthcare professionals to generate detailed and efficient medical reports.

- Integrated multiple AI models into the platform, enhancing radiologists' productivity by providing AI-assisted diagnostic tools.

Inovola
Software Engineer
April 2021 - October 2021 (7 months)

- Working with one of Inovola's clients in Jordan.
- Develop Web applications using Asp.Net core and Blazor stack.

El Sewedy Electrometer Group
Software Engineer
August 2019 - April 2021 (1 year 9 months)
Giza, Al Jizah, Egypt

- Working to develop the management portal developed in asp.net and angular2.
- Working to develop a multi-threading system responsible to communicate with the meters remotely.
- Worked on an integration project between the company and Fawry APIs.
- Worked in developing a C++ driver to integrate Fawry's POS.
- Worked to enhance the backed-end layers by adding new layers to make the project more decoupled and business centralized.
- Worked to implement the TFS server as a side job.

EZZSTEEL
Full Stack Software Developer
July 2018 - August 2019 (1 year 2 months)
Giza, Al Jizah, Egypt

- Worked in developing back-end Asp.net using the repository pattern, and Oracal-MS-SQL databases.
- Worked in a manual migrate Mobile app from angular js to angular2.
- Worked in a complete development cycle from analysis to delivery of the client benefits system to work in the Dekheila factory.
- Worked in developing SSIS packages to clean databases for the Power Bi server.

EZZSTEEL
Software Developer Internship
June 2017 - September 2017 (4 months)
Giza, Al Jizah, Egypt

Worked in developing back-end Asp.net using the repository pattern, and Oracal-MS-SQL databases.

TownSoft
Software Developer   Part-time
September 2014 - September 2017 (3 years 1 month)
Egypt

- Worked in developing Desktop applications for helping dental clinics and hospitals to manage their business cycle With .Net Desktop Applications and SQL Server Databases.
- Joined in implementing the agile methodology in the software cycle

―――――

Education

Alexandria Higher Institute of Engineering & Technology
Bachelor's degree, Mechatronics Engineering · (2014 - 2018)
